HERBALUCAT,
is a range of organic feeds,
made with officinal
plants, to cover all essential
demands without requiring a
veterinary prescription.
your feeds are tailored to
your needs and supervised
by qualified personnel.

In Cereales Montoya (Ecolucat FEEDS) our slogan is 'innovation and exhaustive dedication: Herbalucat'.

Specialised in the exclusive production of feeds with certified organic raw materials for poultry, ruminants, pigs and other species.

After more than 60 years of dedication to the cereals and legumes sector, we began the transformation of our own grains into compound foods over 5 years ago.

RESPILUCAT

Respiratory

Herbal controlled feeds made with certified raw materials suitable for use in organic production enriched with officinal plant extracts, especially advisably used for **prevention and control of respiratory processes**.

Description

Our Ecolucat feeds range sets the basis of nutrition, from which we developed Herbalucat, adding the necessary nutraceutical compounds, using on demand "ad hoc" formulas, depending on the severity of the health problem within livestock farming, and a method of presenting pathologies and zootechnical management measures. All extracts are used from officinal plants and have been evaluated for their proven effectiveness and are correctly approved for organic production.

Target Species

Feed suitable for use in ruminants and monogastrics.

Tips for Usage

Administer according to the instructions on the label, it is recommended to consult with the veterinary technician the daily amounts of administration required, based on the farm's production and health data.

*Eucaliptus sp.

Nature is our ally.

Presentation: 25 kg bag, bulk.

X3LUCAT

Nervous

Herbal controlled feeds made with certified raw materials suitable for use in organic production enriched with officinal plant extracts, especially advisably used for **during the prevention and control of stressful situations.**

Description

Our Ecolucat feeds range sets the basis of nutrition, from which we developed Herbalucat, adding the necessary nutraceutical compounds, using on demand "ad hoc" formulas, depending on the severity of the health problem within livestock farming, and a method of presenting pathologies and zootechnical management measures. All extracts are used from officinal plants and have been evaluated for their proven effectiveness and are correctly approved for organic production.

Target Species

Feed suitable for use in ruminants and monogastrics.

Tips for Usage

Administer according to the instructions on the label, it is recommended to consult with the veterinary technician the daily amounts of administration required, based on the farm's production and health data.

Nature is our ally.

Presentation: 25 kg bag, bulk.

FUNGILUCAT

Digestive

*Cynara scolymus

Herbal controlled feeds made with certified raw materials suitable for use in organic production enriched with officinal plant extracts, especially advisably used for **prevention and control of mycotoxicosis**.

Nature is our ally.

All our organic feed is certified by SOHISCERT SHC Control Agency whom are authorized in organic production with code ES-ECO-002-CM and can be used under the conditions provided in the Regulation EC 889/08 of organic production. In compliance with articles 22, 23 and 24 of the Regulations of organic production CE 889/08, and with the aim of simplifying the documentary procedures regulated in said articles as well as articles 76 and 77 that are required to communicate the use of veterinary medicines of synthesis to the Control Agency or Authority after marketing the product of animal origin as ecological (by batch or individual identification) we make available to our customers and technicians in the sector the use of officinal plants in our feed.

All additives and raw materials of plant origin with a Phytotherapeutic nature that can be used in our organic feed are subject to processes and constant approval documents for compliance with the conditions and restrictions set forth in ecological production.

Coordination and technical supervision by companies specialised in veterinary herbal medicine, with the special collaboration of Dr. Veterinario Maurizio Scozzoli.

Technical Director Álvaro Fernández-Blanco B., veterinarian phytotherapist.
